## PRAISE & PRAYER LETTER

JUNE 2010

### The Tech Team

On May 1st I met the *Independent Baptist Media* (IBM) team at the airport in Port Moresby, our capital city. Gene Sharp and Eric Damron had dedicated a month toward the expansion of *Bible FM* within Papua New Guinea.

The first three days we visited churches in the capital, raising awareness and gathering support for *Bible FM Port Moresby*. Praise God, a church in the capital, Lifegate Baptist, has pledged to give \$1,500 monthly! We are working towards getting our signal there as quickly as possible.

In Mt. Hagen, Gene and Eric cleaned, installed, rewired, hiked and, best of all, preached up a storm. Their industry and energy amazed my people.

*Bible FM* is very thankful to IBM for their vision to help us reach our country with Christian radio.

Please pray as we install VSAT in order to use the internet as our signal carrier to our capital city, Port Moresby.

### The Father-Son Team

Pastor Jay Folk and Jack-of-all-trades-and-master-of-most Ben Folk arrived on May 6th. I am very thankful to the Old Paths Bible Baptist Church of Rochester, NY for sending over this dynamite duo.

Pastor Jay started in working and preaching at the same time from the moment he arrived. Ben tackled anything I threw at him and was a great mentor for our young men.

The highlight of their time here was climbing 12,500' Mt. Kegum. Using the government telephone exchange site, *Bible FM* was able to place a repeating transmitter in a secure location. This allows us to reach into three other provinces. Pastor Jay and Ben were invaluable during the installation and 12-hour round trip hike.

I am grateful for the tremendous example the Folks were to *Bible Truth Baptist Church*. They left a desire for excellence in their wake.

The greatest need in missions is laborers. Missionaries everywhere need all kinds of help. Consider what God wants you to do.

### The Brad Wells Team

Unfortunately, the transmitter we installed on the mountain was faulty. I took a free chopper lift to the site the following week, only to realize I had brought the wrong replacement. The next morning my son, Marshall, and I began the trek on foot once again. This time it was successful and we are hearing good reports of where the signal is reaching. If at first you don't succeed....try, try again!

In the midst of our concentration on *Bible FM*, our church, *Bible Truth Baptist*, has been working hard to finish our building. Both work teams were a great help in installing a new sound and lighting system. Our people are still giving sacrificially and we are planning for a building dedication service in September. We are seeing souls saved in our outreach efforts as well.

Thank you for your prayers and support!

Your Ambassadors in PNG,

*Brad Wells & Family*
